## PROFILE

IT student at Greenwich Vietnam.  
**Six projects delivered**, most of them end to end: interface, server, then shipped and run by me.  
 Strongest on the **interface**.  
**Seeking an Information Technology internship**.

## SKILLS

### Interface design

Layout · Visual hierarchy · Type rhythm · Colour tokens · Responsive · Dark mode · Multilingual  
*Built in the browser with React and Tailwind, tuned on the running build — no Figma.*

### Engineering

React · Next.js · TypeScript · React Native · Node.js · MongoDB · Firebase · Tailwind · PWA · Git  
*Both ends: interface and server, plus a mobile app (React Native, Java).*

### Operations

Deployment · Log reading & incident response · Performance · Technical SEO · Code review  
*Run in production by me: domains, deploys, monitoring, incident response.*  
 Foundation: Python, Express, WebSocket, SQLite · deployed on Vercel, Render, Cloudflare, Netlify.

## EDUCATION & ACTIVITIES

**Greenwich Vietnam** 2022–2027  
 Information Technology · University of Greenwich (UK) with FPT University · graduating 10/2027.

**Youth group leader – Catechist (level 2)**  
 Children's activities, public speaking, group management.

**English** VSTEP B2  
 Level 4, 2024 · reads technical documentation.

## PROJECTS

**Hugo Studio — An ecosystem of digital tools** 04/2026 – now  
**Personal project** · **Design & full-stack development** · **Operations** · [hugowishpax.studio](http://hugowishpax.studio)  

- Built the **shared frame** for the whole system: identity, points wallet, real-time notifications, interface shell.
- Runs as an **installable PWA**. Operated in production by me, including a provider quota overrun.

**Chanh Toa My Tho — Parish information portal** 08/2026 – now  
**Real users** · **Design & full-stack development** · [Demo · chanhtoa.tnttgiaophanmytho.online](http://demo.chanhtoa.tnttgiaophanmytho.online) · [Source](#) · [github.com/HuynhDutruong/FAQ](https://github.com/HuynhDutruong/FAQ)  

- Next.js, TypeScript, Firestore, server-rendered. **Mass times across 27 dioceses** by location; the full Bible.
- Posts sync from the parish **Facebook page** through the Graph API; the access key stays server-side.

**M-Hike — Hiking app for iOS & Android** 06–09/2026  
**Mobile development coursework** · **Design & full-stack development** · [Demo · hiking.hugowishpax.studio](http://demo.hiking.hugowishpax.studio) · [Source · github.com/Hugo-huy2004/Hiking\\_App](https://github.com/Hugo-huy2004/Hiking_App)  

- Two builds**: React Native (Expo, TypeScript) and native Android in Java.
- Works with no signal** — SQLite is the primary store, Firebase syncs in the background. GPS journeys and an SOS screen.

**HWJ — Fine jewellery platform** 01–04/2026  
**Personal project** · **Design & full-stack development** · [Demo · hwj-demo.hugowishpax.studio](http://demo.hwj-demo.hugowishpax.studio) · [Source · github.com/Hugo-huy2004/HWJ\\_demo](https://github.com/Hugo-huy2004/HWJ_demo)  

- React, Node.js, MongoDB, Cloudinary, Google OAuth: accounts, consultation bookings and the cart.
- Priced against the market**: live gold and silver rates, shown as sell and buyback.

**Minh Oi Media — Wedding studio website** 03–04/2026  
**Real client** · **Design & full-stack development** · [Demo · minhoimedia.digital](http://demo.minhoimedia.digital) · [Source · github.com/Hugo-huy2004/job\\_01\\_MinhOi\\_Media\\_studio](https://github.com/Hugo-huy2004/job_01_MinhOi_Media_studio)  

- Worked directly with the client, from requirements through to handover.
- Plain HTML, CSS and JavaScript. Five packages priced on the home page, built portrait-first.

**L3GO Coffee — Café website** 2026  
**With Jason Phan** · **UI/UX design** · [legocoffee.hwagfu.dev](http://legocoffee.hwagfu.dev)  

- Owned the **UI/UX**: colour system, type rhythm, menu flow, how the room is cropped.
- Sixty-eight items **filtered by mood** instead of by category.
