Hugo Wishpax

Information Technology Student · Web Development Internship

Email · contact@hugowishpax.studio **GitHub** · github.com/Hugo-huy2004 **Portfolio** · portfolio.hugowishpax.studio

PROFILE

Final-year Information Technology student with coursework, personal projects and client websites. Seeking a web development internship to contribute with React, TypeScript and Node.js while learning through mentorship, code review and teamwork.

SKILLS

Used in web projects React · JavaScript / TypeScript · HTML / CSS · Node.js / Express · MongoDB

Interfaces, APIs and data storage.

Project-based practice Next.js · Firestore · React Native (Expo) · SQLite

A community website and mobile coursework.

Working tools Git / GitHub · Vercel / Render

Source control and website deployment.

EDUCATION

Greenwich Vietnam **2023-2027**

Information Technology · University of Greenwich (UK) - Ho Chi Minh Campus · expected graduation 08/2027.

Youth Leader · Level 2 **2018-2025**

My Tho Diocese · Executive Board · Web · chanhtoa.tnttgiaophanmytho.online · 7 years of youth leadership, event coordination and training.

English **VSTEP B2**

Level 4, 2024 · reads technical documentation.

SELECTED PROJECTS

Hugo Studio - An ecosystem of digital tools

04/2026 - now

Personal project · Design & full-stack development · Operations · Demo · hugowishpax.studio

- **Designed a shared architecture** across many apps: one identity layer, points wallet, real-time notifications (React, Node.js, MongoDB, WebSocket).
- **Deployed and operated production alone**: domains, PWA delivery, log reading, resolving a provider quota overrun.

Chanh Toa My Tho - Parish information portal

08/2026 - now

Real users · Design & full-stack development · Demo · chanhtoa.tnttgiaophanmytho.online · Source · github.com/HuynhDutruong/FAQ

- **Full-stack development** in Next.js, TypeScript and Firestore; server-side rendering to make reference content searchable.
- **Integrated the Facebook Graph API** for automatic content sync; configured Firestore rules to restrict data access.

M-Hike - Hiking app for iOS & Android

06-09/2026

Mobile development coursework · Design & full-stack development · Demo · hiking.hugowishpax.studio · Source · github.com/Hugo-huy2004/Hiking_App

- **Built a mobile app for two platforms**: React Native (Expo, TypeScript) and native Android in Java.
- **Designed an offline-first architecture**: local SQLite as the source of truth, Firebase background sync, GPS data handling.

Minh Oi Media - Wedding studio website

03-04/2026

Real client · Design & full-stack development · Demo · minhoimedia.digital · Source · github.com/Hugo-huy2004/job_01_MinhOi_Media_studio

- **Worked directly with a client**: requirements, scoping, handover, and training them to edit it themselves.
- **Optimised performance and responsiveness** in plain HTML, CSS and JavaScript, with no framework dependency.
