PROFILE

I think in products: I start from the user flow, design the interface, then ship it for real with React and AI pair-programming — the workflow that lets me run Hugo Studio, a 20-app portal in 9 languages, on my own. My strength is turning ideas into things people can use: specifying requirements, testing, integrating, and running production from domains to incident debugging. **Looking for a UI/UX or Frontend internship** to learn how a professional team works.

SKILLS

Product & UI/UX

- Figma
- User Flows
- Wireframing
- Prototyping
- Responsive
- Design Systems

Sharpened on 2 real client & team projects — from requirements gathering to developer hand-off.

Frontend

- React
- JavaScript
- HTML/CSS
- Tailwind CSS
- PWA
- Capacitor
- Git

Learned at Greenwich (Web Programming) and used hands-on in the HWJ coursework and Hugo Studio.

AI-assisted development & operations

- Spec & code review
- Testing
- Deployment
- Log analysis
- Scrum / Agile

My core workflow on Hugo Studio: I spec and review, AI writes most of the code, I test, integrate, and deploy.

University foundation: C#, Python, PHP, MySQL, Node.js/Express, MongoDB, WebSocket — enough to read and integrate backend code. Deployed on Vercel, Render, and Cloudflare.

LANGUAGES

English VSTEP B2
 Level 4, 2024 · able to read technical documentation.

FLAGSHIP PROJECT

Hugo Studio — Digital toolkit ecosystem for students

04/2026 – present

Product owner · UI/UX · Frontend integration · Operations · hugowishpax.studio

- Designed and operated a PWA/native portal with **20 apps & games**, 9 languages, member identity, Hugo Store, JOY wallet, and realtime notifications.
- Developed **Bio Studio**: members publish personal pages at `/bio/{slug}` with 3 themes, live preview before publishing, and dynamic SEO.
- Built **HugoKit** (ZIP workspace, image/video compression via Sharp/FFmpeg) with server-side authentication, safety limits, and temp-file cleanup.
- Run production end to end: domains, multi-platform deploys, log-driven incident debugging, and re-architecting around each provider's billing limits.

PRODUCTS SPUN OUT OF HUGO STUDIO

Each app ships on its own public URL and runs right in the browser — try any of them without an account.

Hugo Learning — Self-paced coding platform

First 10 lessons free

One step, one screen

HTML, CSS, JavaScript, SQL, and PHP tracks; hands-on practice inside the lesson, nothing to install.

hugowishpax.studio/study

Server-graded exams · certificates

Grading runs server-side so results can't be edited; certificates are issued with a grade band.

HugoKit — Web file toolkit

3 free runs/day

ZIP extraction, image/video compression via Sharp/FFmpeg, QR codes, and email signatures — server-side with safety limits.

hugowishpax.studio/hugokit

3D Chess & Gomoku

Engine written from scratch

The bot searches for itself: negamax with alpha-beta pruning, quiescence search, and piece-square tables across difficulty levels.

OTHER PROJECT EXPERIENCE

Minh Oi Media — Photo studio website (real client)

Mar–Apr 2026

UI/UX Design

Worked directly with the client; portfolio layout and booking flow · minhoimedia.digital

HWJ — Fine jewellery platform (team coursework)

Jan–Apr 2026

Frontend Developer · UI/UX

Built the responsive frontend, coordinating with the backend teammate · demohwj.hugowishpax.studio

EDUCATION & LEADERSHIP

Greenwich Vietnam

2022–2027

Information Technology · with the University of Greenwich (UK) and FPT University · expected graduation 10/2027.

Volunteer Youth Group Leader & Instructor, Level 2

Led children's activities, spoke to groups, and coordinated teams.
