PROFILE

I think in products: I start from the user flow, design the interface, then ship it for real with React and AI pair-programming — the workflow that lets me run Hugo Studio, a 20-app portal in 9 languages, on my own. My strength is turning ideas into things people can use: specifying requirements, testing, integrating, and running production from domains to incident debugging.

SKILLS

Product & UI/UX

- Figma
- User Flows
- Wireframing
- Prototyping
- Responsive
- Design Systems

Sharpened on 2 real client & team projects — from requirements gathering to developer hand-off.

Frontend

- React
- JavaScript
- HTML/CSS
- Tailwind CSS
- PWA
- Capacitor
- Git

Learned at Greenwich (Web Programming) and used hands-on in the HWJ coursework and Hugo Studio.

AI-assisted development & operations

- Spec & code review
- Testing
- Deployment
- Log analysis
- Scrum / Agile

My core workflow on Hugo Studio: I spec and review, AI writes most of the code, I test, integrate, and deploy.

University foundation: C#, Python, PHP, MySQL, Node.js, MongoDB — enough to read and integrate backend code. Deployed on Vercel, Render, and Cloudflare.

LANGUAGES

English

VSTEP B2

Level 4, 2024 · able to read technical documentation.

Mandarin Chinese

Elementary

Approximately HSK 2 level · not certified.

FLAGSHIP PROJECT

Hugo Studio — Digital toolkit ecosystem for students

04/2026 — present

Product owner · UI/UX · Frontend integration · Operations · hugowishpax.studio

- Designed and operated a PWA/native portal with **20 apps & games**, 9 languages, member identity, Hugo Store, JOY wallet, and realtime notifications.
- Developed **Bio Studio**: members publish personal pages at `/bio/{slug}` with 3 themes, live preview before publishing, and dynamic SEO.
- Built **HugoKit** (ZIP workspace, image/video compression via Sharp/FFmpeg) with server-side authentication, safety limits, and temp-file cleanup.
- Run production end to end: domains, multi-platform deploys, log-driven incident debugging, and re-architecting around each provider's billing limits.

LIVE DEMOS

Runs right in the browser, nothing to install — HugoKit just needs a Google sign-in; Radio and Aura work instantly.

HugoKit — Web-based file toolkit

Google sign-in · up to 50 MB

ZIP workspace — online extraction

Inspect ZIP contents, browse the file tree, and extract/download individual entries on the web.

QR code generator

QR codes for URLs, vCards, Wi-Fi, and text; downloadable as PNG.

hugowishpax.studio/member/utilities/handle

Image & video compression

JPG, PNG, WebP, and video at 3 quality levels via Sharp/FFmpeg.

Email signatures & secure links

Rich Text/HTML signatures for Gmail and Outlook; password-protected share links with visit tracking.

Hugo Radio

Listen free

Lofi & news stations for studying; sign in to save stations and sync listening time.

hugowishpax.studio/radio

HugoAura

Free

Pomodoro timer with lofi music; save focus streaks and sync devices when signed in.

OTHER PROJECT EXPERIENCE

Minh Oi Media — Photo studio website (real client)

Mar–Apr 2026

UI/UX Design

Worked directly with the client; portfolio layout and booking flow · minhoimedia.digital

HWJ — Fine jewellery platform (team coursework)

Jan–Apr 2026

Frontend Developer · UI/UX

Built the responsive frontend, coordinating with the backend teammate · demohwj.hugowishpax.studio

Platform: React · PWA/Capacitor · Express/MongoDB · WebSocket · Python AI · Vercel/Render/Cloudflare

EDUCATION & LEADERSHIP

Greenwich Vietnam 2022–2027

Information Technology · programme delivered with the University of Greenwich (UK) and FPT University.

Volunteer Youth Group Leader & Instructor, Level 2

Led children's activities, spoke to groups, and coordinated teams.
